16.						36.					
17.						37.					
18.						38.					
19.						39.					
20.						40.					

CHOOSE THE MOST CORRECT ANSWER:

1- In the figure behind (Fig. B2), the pointed structure at (2) is opened to the:

- a. Right atrium by semilunar valve
- b. Left atrium by semilunar valve
- c. Right ventricle by atrioventricular valve
- d. Right ventricle by semilunar valve**
- e. left ventricle by atrioventricular valve

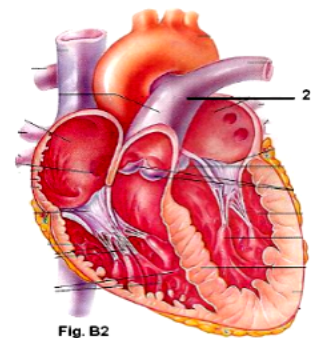

Fig. B2

2- In the figure behind (Fig. B3), the pointed structure at (3) is:

- a. Endodermis
- b. Epidermis
- c. Meristematic
- d. Pith**
- e. Mesoderm

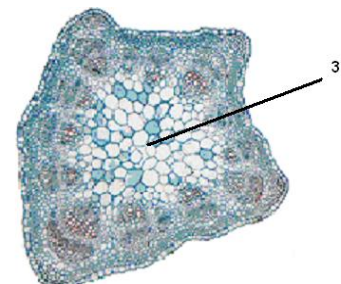

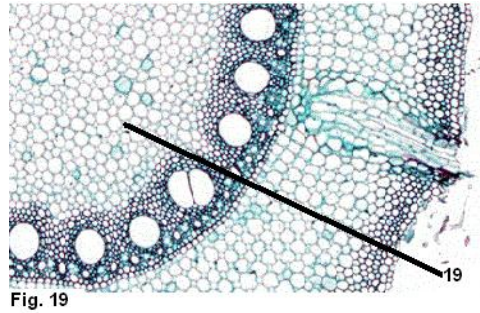

Fig. B3

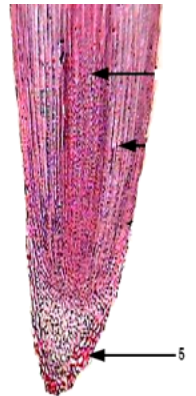

3- The figure behind (fig. 19) represents which one of the followings:

- a. **Monocot Root**
- b. Dicot stem
- c. Monocot stem
- d. Dicot root
- e. Woody stem

4- In the figure behind (Fig. B5), one of the followings is NOT correct about the pointed structure at (5):

- a. **Increases the length of the root**
- b. Directed the growth of the root down ward
- c. Protects the apical meristematic tissue
- d. It is the root cap
- e. It can't be divided

:One of the following organs belong to both human digestive and respiratory system -5

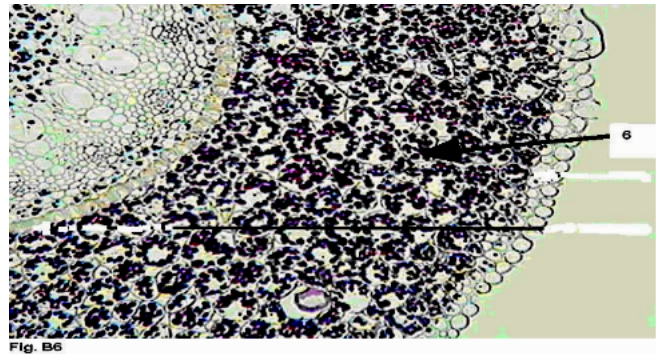

- a. Larynx
- b. Esophagus
- c. Lung
- d. Trachea
- e. **Pharynx**

6- The function of sebaceous glands in human skin is to

- a. Secret poison
- b. **Lubricate the skin surface**
- c. Secret mucus
- d. Secret sweat
- e. All of the above

7- In the figure behind (Fig. B6), The function of the pointed layer at (6) is :

- a. Supporting
- b. Strengthen
- c. Storage
- d. Transport water and minerals
- e. **Both " c " and " d "**

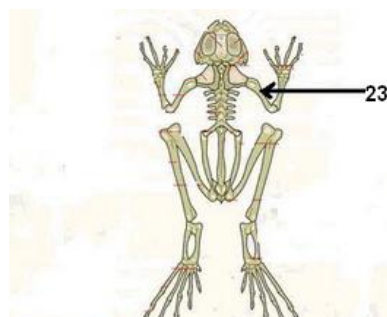

8- The cavity where the bone cells located is called:

- a. **Lacunae**
- b. Osteocytes
- c. Chondrocyte
- d. Hepatocyt
- e. Fibrocyts

9- In the figure behind (Fig. 23), The pointed bone is:

- a. Tibia - fibula
- b. Astragalus - calcaneum
- c. Radio - ulna
- d. **Humerus**

e. Femur

10- All of the followings are reproductive organs in plants EXCEPT:

- a. Leaves
- b. Seeds
- c. Fruits
- d. Flower
- e. Leaves and flower

11- A flower having sepals, petals, and stamen only is:

- a. Complete perfect
- b. Incomplete imperfect
- c. Complete imperfect
- d. Incomplete perfect
- e. Can't determine

12- Chiasmata formation and crossing over occur during -12

- a. Prophase of mitosis.
- b. Prophase I of meiosis.
- c. Prophase II of meiosis.
- d. Metaphase I of meiosis.
- e. Metaphase of mitosis.

13- In a young root, the sequence of tissues from the outside to the center is:

- a. Epidermis, pericycle, cortex, endodermis, primary phloem, primary xylem
- b. Epidermis, cortex, pericycle, endodermis, primary phloem, primary xylem
- c. Epidermis, cortex, primary phloem, primary xylem, endodermis, pericycle
- d. Epidermis, primary phloem, cortex, primary xylem, endodermis, pericycle
- e. Epidermis, cortex, endodermis, pericycle, primary phloem, primary xylem

14- In human, the anatomical term _____ refers to a body part that is toward the head.

- a. Anterior
- b. Superior
- c. Medial
- d. Caudal
- e. Posterior

15- In the figure behind (Fig. B9), The pointed structure is:

- a. Optic lobe in the dorsal side
- b. Optic chiasma in the ventral side
- c. Optic lobe in the ventral side
- d. Optic chiasma in the dorsal side
- e. Infundibulum in the ventral side

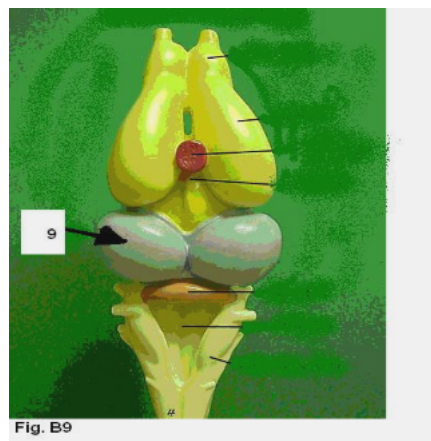

Fig. B9

16- What is the embryological structure that gives rise to the plant's stem system?

- a. Radicle
- b. Shoot apical meristem
- c. Phyllotaxis
- d. Plumule
- e. Foliaige

17- Which one of the followings is **NOT** part of human's skin

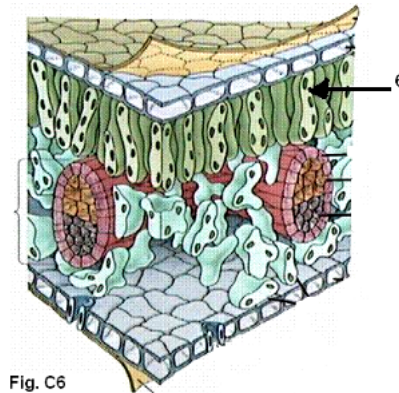

- a. Sweat gland
- b. Poisonous gland
- c. Subcutaneous layer
- d. Sebaceous gland
- e. Hair follicle

- 18- The membrane which surrounded the human's heart is called:
- a. Pia matter
 - b. Pericardium**
 - c. Meninges
 - d. Cerebrospinal fluid
 - e. Serosa
- 19- Human cheek epithelial cell and bacterium have in common:
- a. Capsule
 - b. Cell wall
 - c. Plasma membrane**
 - d. Flagellum
 - e. Nucleus
- 20- Examining of microscopic slides usually begins with which one of the following objective lens?
- a. High
 - b. Low**
 - c. 100X
 - d. 1000X
 - e. It doesn't matter which objective is.
- 21- The outermost structure of mammals' intestine is the ____.
- a. Cortex
 - b. Medulla
 - c. Capsule
 - d. Pelvis
 - e. Serosa**
- 22- The plant's tissues which specialized in transporting of water and minerals is
- a. Collenchyma
 - b. Xylem.**
 - c. Parenchyma.
 - d. Phloem
 - e. Periderm
- 23- Frogs can change the color of their skin due to the presence of :
- a. Poisonous glands
 - b. Sweat glands
 - c. Sebaceous glands
 - d. Mucus glands
 - e. Melanophore**
- 24- The trachea is part of the _____ system
- a. Digestive
 - b. Nervous
 - c. Respiratory**
 - d. Cardiovascular
 - e. Circulatory system
- 25- If a blood group test was done, and the result came out with agglutination with anti-A serum and anti-B serum, but NOT with anti-D serum then the blood group is:
- a. AB⁺
 - b. O⁺
 - c. O⁻
 - d. AB⁻**
 - e. B⁺
- 26- A cell has mitochondria, ribosomes, smooth and rough ER, and other parts. Based on this information, it could not be
- a. A cell from a pine tree.
 - b. A grasshopper cell.
 - c. A yeast (fungus) cell.
 - d. A bacterium.**

e. Actually, it could be any of the above.

27- In the figure behind (Fig. C6), The pointed layer at (6) is composed from which one of the following plant's cells?

- a. **Chlorenchyma**
- b. Sclerenchyma
- c. Parenchyma
- d. Collenchma
- e. Surface cells

28- Cytokinesis in animal cells takes place by:

- a. **Vesicle formation**
- b. Cell plate formation
- c. Spindle formation
- d. Aster formation
- e. **Furrowing**

29- A BASEMENT MEMBRANE is present in all _____ tissue

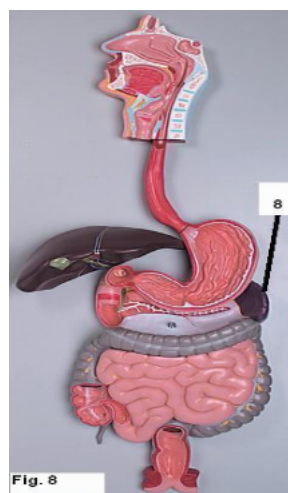

- a. **Epithelial**
- b. Nervous
- c. Muscle
- d. Connective
- e. Cartilage

30- All of the following parts are on the ventral view of frog's heart **EXCEPT**:

- a. Ventricle
- b. Right and left auricle
- c. **Sinus venosus**
- d. Truncus arteriosus
- e. Aorta

31- In the figure behind (Fig. 8), the structure pointed at " 8 " is:

- a. Liver
- b. **Cecum**
- c. Gall bladder
- d. **Spleen**
- e. Pancreas

32- The male reproductive system includes all **EXCEPT** which of the followings ?

- a. Testes
- b. Epididymis
- c. **Fimbriae**
- d. Prostate

e. Cowper's gland

33- The ileum layer that consists of finger- like folds (villi) is

- a. **Mucosa**
- b. Muscularis
- c. Submucosa
- d. Serosa
- e. Horny

34- In the figure behind (Fig. B10), one of the following labels is matched with the numerated parts 1, 2, 3, 4, and 5, respectively.

- a. **Testes – Adrenal gland – Ureter – Rectum – Urinary bladder**
- b. Adrenal gland – Ureter – Wolffian duct – Rectum – Urinary bladder
- c. Bidder's organ – Adrenal gland – Urethra – Rectum – Urinary bladder
- d. Bidder's organ – Adrenal gland – Ureter – Ovisac – Urinary bladder
- e. Bidder's organ – Adrenal gland – Ureter – Ovisac – Urinary bladder

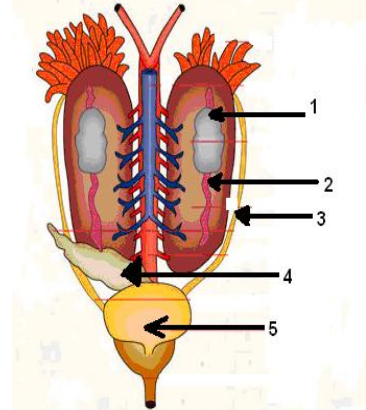

Fig. B10

35- Which one of the following tissues is composed of dead cells?

- a. Epidermis
- b. **Xylem**
- c. Meristematic
- d. Parenchyma
- e. phloem

36- The membrane which surrounded the spinal cord is called:

- a. **Pia matter**
- b. Pericardium
- c. Meninges
- d. Cerebrospinal fluid
- e. Serosa

37- The outermost structure of a kidney is the ____.

- a. Cortex
- b. Medulla
- c. **Capsule**
- d. Pelvis
- e. Serosa

38- Which of the following is NOT found in the kidney cortex?

- a. Glomerulus
- b. Bowman capsule
- c. **Loop of henle**
- d. Proximal tubule
- e. Distal tubule

39- In the human's heart, the semilunar valve lies between:

- a. Pulmonary trunk and left ventricle

- b. Pulmonary trunk Aorta and right ventricle
- c. Right atrium and right ventricle
- d. Left atrium and left ventricle
- e. Left and right ventricle

40- In the figure behind (Fig. B15) represents which one of the following connective tissue

- a. Loose connective tissue
- b. Dense connective tissue
- c. Adipose connective tissue
- d. Bone connective tissue
- e. Hyaline cartilage

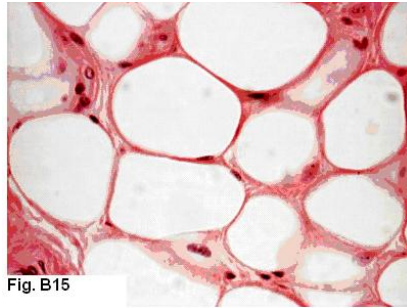

Fig. B15

GOOD LUCK
